Education

- Bachelor In Computer Science , Mohammed El Bachir Ibrahimi,Algeria 2022
- Master In Business Intelligence , Mohammed El Bachir Ibrahimi,Algeria 2024
- Phd Deep Learning Medical Image Analysis , Mohammed El Bachir Ibrahimi,Algeria 2025

Professional Experience

Hader | Lead Flutter Developer

September 2025 – Present

- Architected a complex business and client role based app using **Bloc** and **GoRouter**
- Improved app performance by implementing **Caching** with **Hive** , **Dio** and **Optimistic Updates** through bloc.
- Optimized deployment workflows by implementing **CI/CD** pipelines on **Git Tea**.
- Designed and implemented a **Responsive** interface for different device screens.
- Integrated **Firebase** crash analytics and **Push Notifications**.
- Implemented a **Kotlin-Native** plugin for connecting through **Bluetooth** and printing bills on an x-printer.
- Architected a custom modular **Clean Domain Driven Architecture** and a **coding system** that improved the team productivity.
- Deployed two apps to **Playstore** a customer based and business based.

Ibdapro | Lead Developer

February 2025 – September 2025

- Lead the **Planning** , **Design** and implementation a two mobile apps for a government project.
- Developed and Deployed 2 **Flutter Apps** to **Playstore** one for citizens and one for officials.
- Implemented **Real Time** chats through **Web Sockets** .
- Implemented **Env** and **Flavor** based builds for better **CI/CD** pipelines.
- Implemented file **Uploads** through **Form Data**.
- Architected a clean and scalable infrastructure services pattern for handling **Rest Apis**.

OiluCode | Computer Vision Research Engineer

February 2024 – September 2024

- Developed a **Java Android** app with 3D rendering using ogre.
- Developed a **Jni** wrappers for communicating with our custom **Native C++ Binaries**.
- Completed a computer vision project pending **U.S. Patent (63/199,424)**, stalled for 2 years.
- Developed an innovative **Homography-Free Algorithm** for fiducial markers with **C++** performance between 2-10 ms.

Freelance / Consulting Projects

Sarl Belmanaa | Odoo Integrator

October 2024 – November 2024

- * Implemented an in-house Odoo ERP integration, saving 5,000,000 DZD.

AnFashion | Consultant & Systems Migration Lead

September 2023 – February 2024

- * Resolved a critical technical conflict over one year between the company and its development agency.
- * Managed complete infrastructure, reducing monthly costs by over 25,000 DZD.
- * Led a complex migration to Magento 2, including mail server recovery and .dz domain configuration.

Research

LWCMLP for Medical Imbalance Analysis

2025-2026

- * Designed an innovative CNN architecture optimized for computational efficiency, improving disease classification by 7% across multiple datasets, with modularity and performance surpassing SqueezeNet.

S-Attention for Medical Datasets

2025-2026

- * Developed a mathematical variant of the classical attention mechanism, improving GFlops efficiency while maintaining the same performance as standard attention.

Projects

Dive Competition - [dive-club](#)

May 2023 - October 2023

- Automated regional swimming competitions, increasing transparency and accuracy of results.

Death Note - [death-note-hackathon](#)

2023

- Integrated OpenAI and DALL·E APIs to develop a web app for an international hackathon, offering a unique AI-driven experience (Convex / WebDevCody hackathon).

Agritech - [agritech-seminar.vercel.app](#)

May 2022

- Digitized the organization and participant management of a national seminar at the university via a dedicated mobile app and website.
