## Education

---

- Bachelor In Computer Science , Mohammed El Bachir Ibrahimi,Algeria 2022
- Master In Business Intelligence , Mohammed El Bachir Ibrahimi,Algeria 2024
- Phd Deep Learning Medical Image Analysis , Mohammed El Bachir Ibrahimi,Algeria 2025

## Professional Experience

---

### Hader | Fullstack Developer

September 2025 – Present

- Improved performance by implementing **Caching** through **Tanstack Query** and **Optimistic Updates** on successful api calls .
- Integrated **Firebase** crash analytics and **Push Notifications**.
- Architected a complex business role based web app using **Tanstack Router** and **Custom Role Check Hooks**
- **Dockerized** and deployed an odoo instance for internal enterprise needs , using **Dokploy** on a **Hetzener Cloud Vps**.
- Implemented scalable **Rest Api** based service using **Axios** for better readability and re-usability.
- Implemented a responsive dashboard using **Tailwind Css** and **Mantine** .
- Implemented dynamic filters and paginations using **Ag-Grid** and a **Tanstack Query**.
- Worked with hybrid state management making use of **Zustand** for global state and **Context** for screen scoped data to avoid memory degrade on large data.
- Developed and Deployed 2 **Flutter Apps** to **Playstore** .

### Ibdapro | Lead Developer

February 2025 – September 2025

- Lead the **Planning** , **Design** and implementation of three projects including a government grade project.
- Improved existing **PostgreSql** database performance by implementing **Indexes** and **Materialized Views**.
- Implemented **Real Time** chats using **Web Sockets** .
- Migrated a legacy **Node.js/Express.Js** into **Nest.Js** improving maintainability and scalability .
- Implemented encrypted file **reads** and **uploads** through .
- Designed and implemented responsive dashboard using **Ant Design** and **Tailwind Css** .
- Implemented a **Reverse Proxy** for **re-routing** api request to **Region** based instances where each instance represented a legally separate entity .
- Implemented **Redis Caching** to improve api performance on critical and high frequency requests .
- Developed and Deployed 2 **Flutter Apps** to **Playstore** .

### OiluCode | Computer Vision Research Engineer

February 2024 – September 2024

- Developed a **Java Android** app with 3D rendering using **ogre**.
- Developed a **Jni** wrappers for communicating with our custom **Native C++ Binaries**.
- Completed a computer vision project pending **U.S. patent (63/199,424)**, stalled for 2 years.
- Developed an innovative **Homography-Free Algorithm** for fiducial markers with **C++** performance between 2-10 ms.

## Freelance / Consulting Projects

---

### Sarl Belmanaa | Odoo Integrator

October 2024 – November 2024

- \* Implemented an in-house Odoo ERP integration, saving 5,000,000 DZD.

### AnFashion | Consultant & Systems Migration Lead

September 2023 – February 2024

- \* Resolved a critical technical conflict over one year between the company and its development agency.
- \* Managed complete infrastructure, reducing monthly costs by over 25,000 DZD.
- \* Led a complex migration to Magento 2, including mail server recovery and .dz domain configuration.

## Research

---

### LWCMLP for Medical Imbalance Analysis

2025-2026

- \* Designed an innovative CNN architecture optimized for computational efficiency, improving disease classification by 7% across multiple datasets, with modularity and performance surpassing SqueezeNet.

### S-Attention for Medical Datasets

2025-2026

- \* Developed a mathematical variant of the classical attention mechanism, improving GFlops efficiency while maintaining the same performance as standard attention.

## Projects

---

### Dive Competition - [dive-club](#)

May 2023 - October 2023

- Automated regional swimming competitions, increasing transparency and accuracy of results.

### Death Note - [death-note-hackathon](#)

2023

- Integrated OpenAI and DALL·E APIs to develop a web app for an international hackathon, offering a unique AI-driven experience (Convex / WebDevCody hackathon).

### Agritech - [agritech-seminar.vercel.app](#)

May 2022

- Digitized the organization and participant management of a national seminar at the university via a dedicated mobile app and website.
