Professional Summary

Lead Software Engineer & Deep Learning PhD researcher with a track record of reducing development time by 40%. Expert in React.js, Flutter, and NestJS, Focused in translating client needs into high-value business requirements and accelerating market entry.

Work Experience

Hader

September 2025 - Now

- Optimized the team development speed by bridging the gap across the frontend , backend and mobile
- Reduced projects development time by 25% , capturing business requirements and finding creative market entry

Ibdapro ibdapro.com

Mars 2025 - September 2025

- Reduced development time by over 40% , architected and implemented robust mobile flutter architecture
- Improved codebase scalability and maintainability by migrating legacy express.js to nest.js
- Took charge of conception and planning , delivering 3+ projects in the span of 6 months

Spa Condor Electronics condor.dz

November 2024 - Mars 2025

- Reduced the hr personnel workload by over 30% digitalizing the recruitment process
- Engineered a custom power apps/automate solution to upload varying file formats to one drive. That enabled the development of over 5 projects enterprise wide depending on it.

Sarl Belmanaa sarlbelmanaa.com

October 2024 - November 2024

- Cut company extra costs of up to 5000000 DA by intergrating odoo erp system in house ,optimizing some aspects of the company process

OiluCode - US patent: 63/199, 424- oilucode.net

February 2024 - September 2024

- Drove progress on a computer vision research that had been postponed for 2 years, playing a pivotal role in accelerating development and achieving completion within 4 months of joining
- Developed an original homography-less processing algorithm in fiducial markers
- Led development of low level c++ binaries and optimizing the code resulting in a 2-10ms benchmark

AnFashion - anfashion.dz

September 2023 - February 2024

- Mediated a conflict between the development agency and the company solving critical issues that had persisted for over a year.
- Took over the development agency responsibilities, lowering the operating costs of the website by over 25,000 DZA
- Migrated the old data and redeployed a magento2 instance,fixing the mail server and setting up the dz domain in the process

Projects

Dive Competition - [dive-club](https://dive-club.dz)

Mai 2023 - October 2023

- Automated regional swimming competitions increasing transparency and accuracy of results

Death Note - [death-note-hackathon](https://death-note-hackathon.dz)

2023

- Integrated OpenAI and DALL-E APIs to develop a web app for an international hackathon entry delivering a unique AI-driven experience (Convex/WebDevCody hackathon)

Agritech - agritech-seminar.vercel.app

Mai 2022

- Digitalized the organization and attendance of an official national seminar held in university providng a mobile app and a website for the event .

Skills

- Programming Languages: C++,Java, Dart, JavaScript, TypeScript,Sql
- Databases: Postgres,Mysql, Convex, Supabase, Firebase, SQLite, MongoDB
- Frameworks: Flutter,Next.js, React.js,Node.js,Nest.js
- Concepts: Design Patterns,Clean Code,DDD,Systems Design,Code Architecture,Event Driven Design,TDD,Algorithms,Data Strcutures,Docker
- Soft Skills: Fast Learner,NeuroScience,Communication,Teamwork,Agile,Adaptability
